

Join your fellow town planners, public health practitioners, school administrators, teachers, parents, community groups, and residents in an action-oriented workshop:

Designing a Healthier RI for Our Children: Promoting Physical Activity through Community Design

- Learn how community design affects physical activity levels and contributes to obesity.
- Learn how to improve physical activity through community design.
- Identify strategies and funding sources to address community design and physical activity in your community, including the new RI Safe Routes to School Program.
